Module 1: Introduction to Mobile Computing

1. Explain mobile computing.
2. Explain application of mobile computing.
3. Explain Telecommunication Generations.
4. Explain Cellular systems.
5. Explain frequency re-use.
6. Explain channel assignment strategies.
7. Explain improving coverage & capacity in cellular system.
8. Draw diagram of electromagnetic spectrum for communication & explain it.
9. Define antenna & explain different types of antenna.
10. Explain Signal propagation.
11. Explain multiplexing in wireless communication.
12. Explain FDM (Frequency division multiplexing).
13. Explain TDM (Time division multiplexing).
14. Explain CDM (Code division multiplexing).
15. Explain SDM (Space division multiplexing).
16. Explain Spread Spectrum.
17. Explain DSSS (Direct Sequence Spread Spectrum)
18. Explain FHSS (Frequency Hoping Spread Spectrum)
19. Explain Cochannel interference
20. Compare DHSS & FHSS.
21. Compare slow FHSS & fast FHSS.
